BSR-5036/A

Addressable manual call point

TECHNICAL CHARACTERISTICS					
OPERATION VOLTAGE	21-28V				
STANDBY CONSUMPTION	1mA				
ALARM CONSUMPTION	1.5mA (with activation LED)				
TYPE	Туре А				
USE	Indoor				
DEGREES OF COVER PROTECTION	IP 20				
PRODUCED IN ACCORDANCE WITH	EN 54-11				
OPERATION TEMPERATURE RANGE	-10 to 70 °C				
RELATIVE HUMIDITY	Up to 95%				
CONSTRUCTION MATERIALS	ABS/PC				
EXTERNAL DIMENSIONS	98x94x58mm				
TYPICAL WEIGHT	190gr.				
GUARANTEE	2 years				

Description

BSR-5036/A is a addressable manual call point which activates the fire detection panel. It co-operates with BSR-1116 and BSR-2100 series panels.

It is essential for it to exist in co-operation with the detectors. At least one button has to be placed in every fire detection system, near to the main control panel.

By pushing the clear plastic cover, the button activates the alarm system. The clear plastic cover does not brake but can be reset to its original position with the special plastic key which is included in the package. With this way you can test a specific button as well maintenance the fire detection panel.

In every fire detection system it is essential that you place one button besides the control panel and the rest mainly in corridors and exits of the building.

It is mounted in a clearly visible spot, near at exit or ladder and at a height of 1,5 meters. A red coloured LED that blinks periodically in standby detection mode, is a power indication LED and indicator for the good operation of the device. When a button issues an alarm the LED lights. When we silence the sirens the LED remains lit to show us the detector that issued the alarm.

The LED goes off when we RESET the panel.

Each button has an address with which it is recognized from the panel.

It is forbidden for two devices with same addresses to be connect to the same loop.

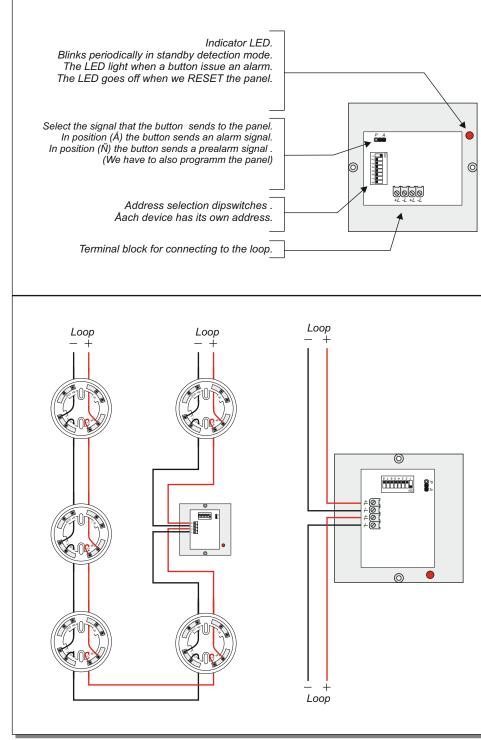

The back page contains all the available address settings which are done using the dipswitch.

The panel references the buttons with the name CALL POINTS.
