GENERAL

The electric insecticides are used to exterminate various annoying insects. The built-in lamps (Black Light) produce a light that attracts insects from a distance. They can be used in every area that many insects exist. They are attracted and they are exterminated by a special glue board. Without using any chemical material it offers a complete protection against many like insects mosquitos, flies, tiny gnats etc.

There is a special removable drawer at the bottom side of the device to replace easily the used glue board.

WARNING!!!

1. When you receive the device, you have to remove the glue board covers by following the steps **b** and **c** (covers removing and replacement).
2. To replace the glue board with a new one follow carefully the below steps.

- a. Remove the plug of the mains.
- b. Push the drawer.
- c. Remove the special drawer and pull the used glue board. Place a new one and reinsert the drawer. Reconnect the device on the mains.

Installation.

In order for the insecticide to operate simply insert the power plug into any suitable wall outlet that is readily accessible. It is placed in a clear and visible place so as to attract insects easily.

WARNING!!!

- The device is suitable for indoor use.
- The device must be kept away from children.
- The device must be not installed in areas with combustible gases or explosive dust.
- When the mains cable is damaged, this must be replaced by our SERVICE department or by an authorized technician.
