BS - 856 / W

The BS-856/W thermostat is a modern solution for temperature control in electric underfloor heating, water underfloor heating and wall-mounted boiler heating systems. With elegant design, practical functionality and Wi-Fi connectivity through the Smart Life app, based on the Tuya platform, it offers comfort, reliability and easy everyday use.

Suitable for a wide range of applications, the BS-856/W is compatible with European installation boxes. Its dedicated mounting base ensures quick and simple installation, while the available color options, such as white and black, allow it to blend harmoniously into any modern interior.

Combining 0.5°C temperature control accuracy, weekly programming and memory function, the thermostat delivers stable performance and maximum convenience. The child lock function enhances user safety, while temporary manual mode allows immediate temperature adjustment without losing the programmed settings.

The BS-856/W supports 5+2 days, 6+1 days or 7-day weekly programming, enabling personalized temperature control according to the needs of each space and user. The holiday mode helps save energy during periods of absence, maintaining temperature control in a practical and efficient way.
