DOT LIGHT

The new DOT Light range combines modern design, high luminous performance and application flexibility in one complete family of emergency luminaires. Available as a Downlight emergency luminaire or as an emergency / exit sign luminaire with pictogram, DOT Light offers different operating modes and autonomy options to meet the requirements of a wide range of installations. With IP65 protection, $LiFePO_4$ battery technology and maintained / non-maintained operation, DOT Light provides a reliable and contemporary solution for commercial and public environments

DOT Light downlight
A discreet and compact emergency luminaire designed to provide effective illumination at specific points of interest, such as firefighting equipment, fire hose cabinets and other critical safety locations. Its minimal design allows seamless integration into modern interiors.

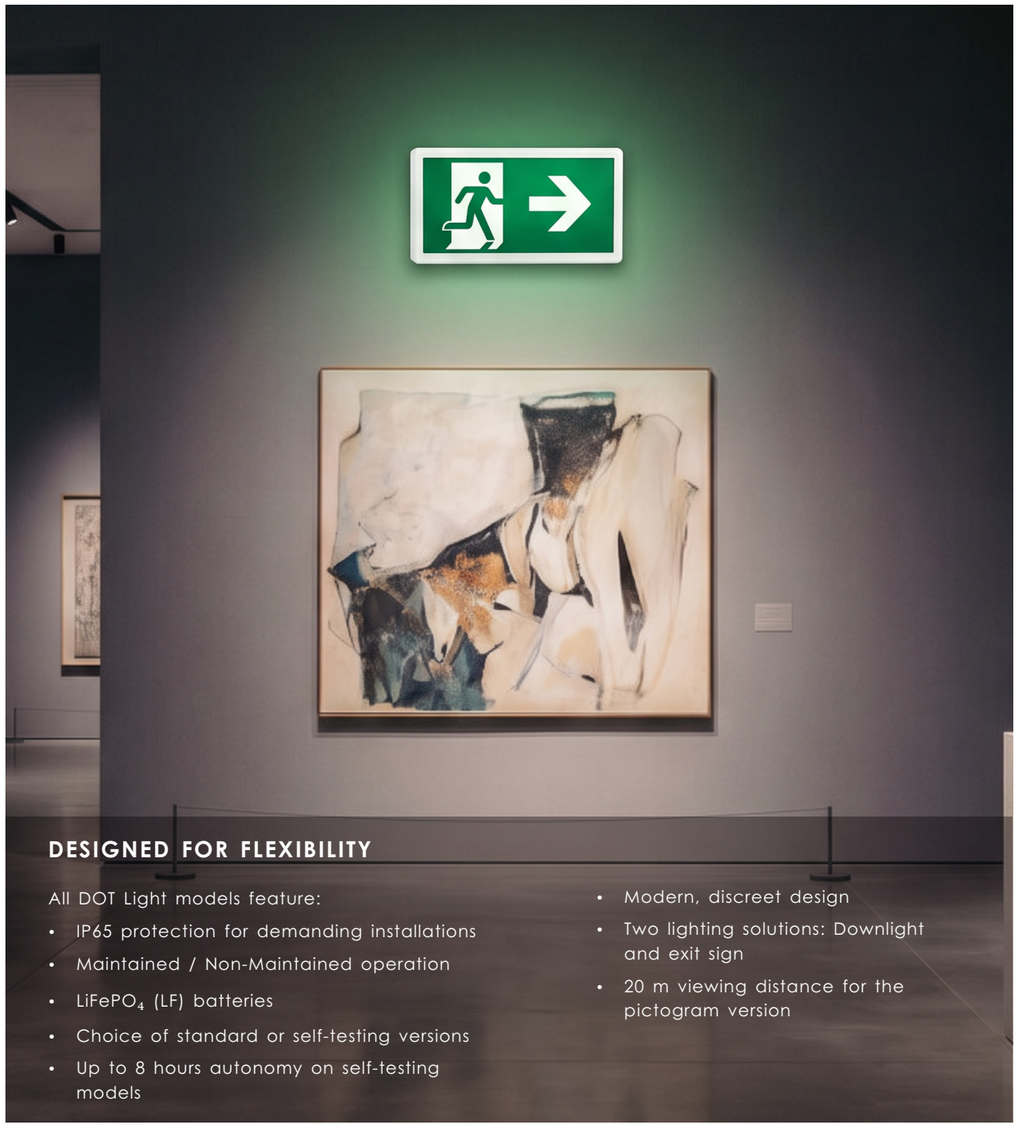

DOT Light emergency & exit sign luminaire
A versatile emergency luminaire designed for general emergency lighting and safety signage applications. It can be used as a standard emergency luminaire or, by adding the appropriate pictogram, as an exit sign with a viewing distance of up to 20 m. Its flexible design allows a single luminaire to cover different emergency lighting and signage requirements.

DESIGNED FOR FLEXIBILITY

All DOT Light models feature:

- IP65 protection for demanding installations
- Maintained / Non-Maintained operation
- $LiFePO_4$ (LF) batteries
- Choice of standard or self-testing versions
- Up to 8 hours autonomy on self-testing models
- Modern, discreet design
- Two lighting solutions: Downlight and exit sign
- 20 m viewing distance for the pictogram version

STANDARD MODELS

DOT Light standard models are available with 1-hour or 3-hour autonomy, providing flexible emergency lighting solutions within one unified, modern design.

1 hour
Emergency luminous flux: 330 lm
Battery: $LiFePO_4$ 3.2 V / 1.6 Ah
3 hours
Emergency luminous flux: 200 lm
Battery: $LiFePO_4$ 3.2V / 1.6Ah

SELF-TESTING MODELS

For installations requiring enhanced monitoring and easier maintenance, DOT Light is also available in a self-testing version. The integrated self-test function automatically performs the required luminaire checks, helping identify potential faults in time while reducing the need for manual maintenance inspections.

Autonomy / Operation Luminous Flux
1 hour 530 lm
3 hours 330 lm
8 hours 125 lm
Mains operation: 530 lm
Power consumption: 7.8 W / 8.35 VA
Battery: $LiFePO_4$ 3.2V / 3Ah
