

## BS-531/1/MAR SOUNDER WITH BEACON FOR FIRE DETECTION PANEL

| TECHNICAL CHARACTERISTICS |  |
| :---: | :---: |
| OPERATION VOLTAGE | 21-28V DC |
| MAXIMUM CONSUMPTION | 1.2 W |
| MAXIMUM SOUND OUTPUT in1m | 94 dB (sound effect 1) |
| BEACON | 1 Power LED |
| TYPE OF APPLICATION ENVIRONMENT | Type A |
| MOUNTING | Wall |
| COVERAGE (y) | 6 m around the siren at an angle of $180^{\circ}$ |
| MOUNTING HEIGHT ( x ) | 2.4 m max |
| COVERAGE VOLUME CODE | W-2.4-6 |
| COVERAGE VOLUME | $86.4 \mathrm{~m}^{3}(\max )$ |
| FLASH RATE | 1 Hz (Switchable to 0.5 Hz) |
| FLASH COLOUR | Red |
| DEGREES OF COVER PROTECTION | IP 42C |
| PRODUCED IN ACCORDANCE WITH | EN54-3:2001+A1:2002+A2:2006, EN54-23:2010, EN 50130-4:2011, \|EC60092-504 $3^{40}$ Ed.2001+Cor1:2011, EC 60533:1999 Edition 2.0 |
| OPERATION TEMPERATURE RANGE | 0 to $60^{\circ} \mathrm{C}$ |
| RELATIVE HUMIDITY | Up to 95\% |
| CONSTRUCTION MATERIAL | Bayblend FR3010, transparent polycarbonate |
| EXTERNAL DIMENSIONS | $141 \times 141 \times 100 \mathrm{~mm}$ |
| TYPICAL WEIGHT | 230 gr . |
| GUARANTEE | 2 years |

## Thank you for your trust in our products Olympia Electronics - European manufacturer

## GENERAL

This device is Visual Alarm Devices (VAD) for fire detection panels that offer a strong sound output and an optical warning with a beacon and is used on ships. The strong sound and the optical warning beacon cover many square metres. It features two inputs (N1, N2) for the production of two different sounds. This device can co-operate with any fire detection panel (BSR-2104/MAR, BSR2114/MAR, BS-1632, BS-1634, BS-1636, BS636).

## Installation and Connection

1. First, remove the retaining screw, place a flat blade screwdriver in the holes of the plastic hooks and remove the plastic cover (Image 1 on page 2).
2. Remove carefully the beacon connector (Image 2 on page 2).
3. Use the supplied mounting parts to install the siren's base at a height of 2.4 metres from the floor (figure 1 on page 2). Place the plastic plugs and fasten the screws to the mounting holes. Attention!! Make sure that the siren's base is installed upwards as shown in figure on page 4.
4. Place the caps and make a hole in the center
using a small screwdriver. Pass through the caps the cables to connect the device.
5. The ( $+\mathbf{N} 1$ or the $+\mathbf{N} 2$ ) terminal block is connected to the (+) output of Alarm-1 or Alarm-2 of the panel and the $(-)$ of the terminal block is connected to the (-) output of Alarm-1 or Alarm-2 of the panel. Accordingly connect in parallel all the sirens. (The maximum number of sirens depends on the type of the panel).
6. To select various sound effects use the dipswitch 1, 2 and 3 and choose the diserable sound effect, according to tables 2 and 3 on page 3.
7. For LED effect variation use the dipswitch 4 (Table 1) on page 2. On the last siren of the line, we must connect in parallel with its power cables, the terminal resistor that was removed from the alarm contacts of the panel.
8. Reinstall the beacon connector (step 2). Refit the plastic cover until the plastic hooks are securely attached (step 1) and fasten the retaining screw (torque 0.6 Nm ). Attention!! Make sure that the siren's cover is installed in the correct orientation.
9. Test the device after installation.

## WARRANTY

Olympia Electronics guarantees the quality, condition and operation of the goods. The period of warranty is specified in the official catalogue of Olympia Electronics and also in the technical leaflet, which accompanies each product. This warranty ceases to exist if the buyer does not follow the technical instructions included in official documents given by Olympia Electronics or if the buyer modifies the goods provided or has any repairs or re-setting done by a third party, unless Olympia Electronics has fully agreed to them in writing. Products that have been damaged can be returned to the premises of our company for repair or replacement, as long as the warranty period is valid. Olympia Electronics reserves the right to repair or to replace the returned goods and to or not charge the buyer depending on the reason of defection. Olympia Electronics reserves the right to charge or not the buyer the transportation cost.
