

Environmental Policy

Olympia Electronics is an electrical & electronic systems manufacturer such as safety lighting, molecular lighting, fire detecting and alarm systems, thermostats, and ballasts.

In providing value added services for its customers, Olympia-Electronics recognizes the importance that actual and potential interactions of its activities have upon the environment.

Olympia Electronics is committed :

- **Complying with relevant environmental laws, regulations and other requirements applicable to its activities, including REACH & rohs.**
 - **Conducting its activities in a manner that is designed to minimize the impact on the environment and the people who live and work within that environment.**
- **Considering the environmental impact of its activities including the responsible use of natural resources and the appropriate control of waste.**
- **Conforming with the requirements of ISO 14001 under the umbrella of oly-q Integrated Management System and the continual improvement of its Environmental Management System by establishing and meeting environmental objectives and targets.**
- **Working towards continual improvement and prevention of environmental pollution.**
