Olympia Electronics - European manufacturer

GENERAL

The magnetic card lock switch is used to control the power supply of a room.

It has a built-in indicator which is always ON so we can find the device in a dark room when is powered. The consumption of the indicators is very small.

The GR-50 model can be fitted on regular wall outlet mountings. The figure below shows the connection of the device with relay.

ATTENTION!!

When you remove or refit the front plastic cover to install the device, take care to not disturb the magnetic switch.
