

DOUBLE SIDED ELECTRIC INSECT TRAPS WITH ADHESIVE SHEET

TECHNICAL CHARACTERISTICS	RT-72/HACCP	RT-74/HACCP
OPERATION VOLTAGE	220-240V AC/50-60Hz	
MAXIMUM POWER CONSUMPTION	100VA	210VA
FLUORESCENT LAMP	2x15W BL	4x15W BL
DEGREES OF COVER PROTECTION	IP 20	
PRODUCED IN ACCORDANCE WITH	EN 60335-1, EN 60335-2-59	
OPERATION TEMPERATURE RANGE	0 to 60 °C	
RELATIVE HUMIDITY	Up to 95%	
CONSTRUCTION MATERIALS	Bayblend FR3010, electrostatic painted aluminum	
EXTERNAL DIMENSIONS	490 x 118 x 420 mm (L x W x H)	
TYPICAL WEIGHT	3540gr.	4270gr.
GUARANTEE	2 years (1 year for the lamps)	

Thank you for your trust in our products. Olympia Electronics - European manufacturer.

The above product, produced and comply with 93/43 of the European council on the 14th of June 1993. (HACCP)

GENERAL

The electric insecticides are used to exterminate various annoying insects. The built-in lamps (Black Light) produce a light that attracts insects from a distance. They can be used in every area that many insects exist. They are attracted and pass through the interior metal net, they are exterminated by the adhesive sheet.

Without using any chemical material it offers a complete protection against many like insects mosquitos, flies, tiny gnat etc.

WARNING!!!

To clean the special holder (drawer) to which end the insects or to replace the adhesive surface, we must follow the following procedure:

- Remove the plug from the socket.**
 - unlock the special drawer's hook.
 - Remove the special drawer and empty it. If necessary replace the adhesive sheet. Then place the special drawer again and lock the hook. Place the plug into the socket again.
- If we need to change lamps or starters follow the following procedure.*

- Remove the plug from the socket.**
- Remove the protection grid, by extracting it from its retention points.
- Replace the lamp or starter that does not work.
- Place the protection grid in its place by pressing it to secure it to its retention points.
- Place the plug into the socket again.

ATTENTION!!! When the device is operating, the protection grid must be installed and the adhesive sheet's cover must be removed.

Installation.

In order for the insecticide to operate simply insert the power plug into any suitable wall outlet that is readily accessible. It is placed in a clear and visible place so as to attract insects easily .

It includes two eyelets on the top side for ceiling mounting installation by using a chain. These models are suitable for areas such as grocery stores, butchers, greengrocers, patisseries, residential areas, etc.

WARNING!!!

- The device is suitable for indoor use.
- The device must be kept away from children.
- The device must be not installed in areas with combustible gases or explosive dust.
- When the mains cable is damaged, this must be replaced by our SERVICE department or by an authorized technician.
